## **BIGGEST RANGE, BEST PRICES & OUTSTANDING CUSTOMER SERVICE**

#### MESSAGE FROM THE MANAGING DIRECTOR Welcome to 2025!

I hope you all had a restful break with your loved ones and enjoyed time away from the daily routine.

Although many of you have been back at work for some time, I wanted to wish you - our valued customers - much success in this new year. I think we can all agree that it looks to be a challenging one. With consumer spending dropping, resistant inflation, high interest rates and a federal election, there are lots of factors affecting our economy and therefore our businesses.

At Tranzmile, we understand the pressures our customers are facing this year so we will be doubling down on providing you with the best parts range as well as keeping our prices low.

We have already begun expanding our ranges to keep up with customer demand, so you will see many new parts and products coming into our Branches during 2025. As you know, we aim to have the parts you need in the Branches ready to go when you need them!

We also employ the best parts interpreters in the industry so we can help solve those tricky questions that cost you time and money.

Tranzmile is committed to providing parts at competitive prices. This has been our ethos since the day we began and we are proud that people see us as an important part of their success. So if you are sourcing from multiple parts providers, we'd love to sit down so we can do a competitive quote for all of your business. As a family-owned business we can, and will, do deals and - importantly - we have the flexibility to structure our supply model to make sure it works best for you.

If you are not on our weekly specials email to get our regular updates and red hot deals, just email your details to sales@tranzmile.com and we will put you on the list straight away. And remember, make sure you use our Tranzmate app for ordering! Not only do you get an automatic discount when you place an order but you can send photos of what you are looking for direct to our parts interpreters so you don't waste your time trying to source new parts.

As always, as a family-owned business the buck stops with me so please do not hesitate to reach out to me directly if you need something or want to discuss an opportunity, and I look forward to catching up with you in 2025!
